

September 2006

Volume 15 Issue 4

General Fund Revenue Update

General Fund revenue collections for August tracked closely with the Division of Financial Management projection, coming in \$1.2 million higher than anticipated. That brings the two-month fiscal year-to-date collections to about \$14 million, or 4 percent higher than DFM's revised forecast.

The total fiscal year 2007 revised forecast of \$2,662.5 million includes two major changes from the estimate used by the Legislature last spring to set the FY 2007 budget. First, FY 2006 revenues exceeded expectations by \$203 million, which resulted in a higher revenue base. Second, the revised estimate includes a \$147.3 million increase in sales tax collections due to the rate increase included in HB 1 of the Special Session, an increase from 5 percent to 6 percent that becomes effective October 1. HB 1 also increased the ongoing budget by \$250.6 million for public schools and transferred \$100 million to the Public Education Stabilization Fund.

Although \$14 million only represents one-half of one percent of the total projection, it provides some comfort that revenues are tracking with the new forecast. At this early point in the fiscal year, the state budget could be on course for another significant year-end balance, now estimated at about \$212 million.

Contact: Ray Houston

JFAC Schedules Boise Meeting/Tour

The Joint Finance-Appropriations Committee is scheduled to meet in Boise September 28-29 and to tour various facilities in the area. Site visits will include the Department of Health and Welfare State Laboratory, Idaho History Center, Public Archives and Research Library, Department of Correction East Community Work Center, Idaho State Police Complex and POST Academy, Meridian Medical Arts Charter School, Meridian Desert Sage Elementary School, and the privately operated Idaho Correctional Center and state-operated South Idaho Correctional Complex.

In addition to state facility and school site visits, JFAC will receive updated reports on the General Fund, the Capitol restoration and expansion project, GARVEE, the career information system and the recently released audit of the Idaho Historical Society.

Staff Contact: Cathy Holland-Smith

Capitol Restoration Update

When legislative advisory committees on Capitol Restoration and the Legislature's temporary relocation met August 24, the Advisory Committee on Space Allocation and Design approved design concepts for the basement, third and fourth floors of the Statehouse and the Advisory Committee on Relocation approved design concept floor plans for the Capitol Annex (the old Ada County Courthouse). The Idaho Capitol Commission, at a September 1 meeting, approved going forward to the Idaho State Building Authority for the issuance of \$130 million in bonds to finance the Capitol restoration and expansion. Relocation plans have also taken a step forward with the addition of **Robyn Davis** to the Legislative Services Office to help coordinate relocation logistics for the Legislature and staff (see page 8 for more information about Robyn).

Staff Contact: Eric Milstead

Idaho Historical Society Audit Released

The Legislative Audits Division of the Legislative Services Office released a report for the Idaho State Historical Society on August 22, 2006, with three findings and recommendations. The first concerned several issues of noncompliance with state rules and regulations governing travel and purchasing card (p-card) usage. Ten vouchers and monthly p-card transaction summaries were reviewed. The review found that the director:

- ▶ used his p-card to pay for meals and also claimed reimbursement on his travel vouchers;
- ▶ claimed and was reimbursed for car rental and meals while recorded as being on vacation;
- ▶ claimed extra meal and car rental expenses while out of the state without documenting as state business; and
- ▶ claimed reimbursement for meals that were provided at conferences, with no explanation as to why the conference meals were not used.

The report recommends that the Historical Society study state travel and p-card policies and complete a review of all other travel vouchers and p-card purchases of the director. Also, to enhance internal controls and provide oversight, the report recommends that the Office of the State Board of Education review p-card purchases and travel vouchers of the director.

The second finding deals with inefficient and inaccurate accounting, due primarily to not fully utilizing the state's accounting system (STARS). Some of the accounting issues included:

- ▶ documentation could not be provided to show that all federal reimbursement claims had been submitted;
- ▶ some federal grants did not appear on the annual report submitted to the State Controller;
- ▶ lack of awareness of the need to prepare an indirect cost plan; and
- ▶ accounting codes not properly used or logically established.

The report recommends improving accounting by obtaining necessary training, utilizing STARS more effectively, and providing more oversight and review of accounting transactions.

The third finding, repeated from the previous audit, concerns inadequate internal controls, specifically in handling admission receipts at the Historical Museum and Old Penitentiary. For the past three years, annual admission fees for these facilities totaled about \$90,000. However, the amount does not appear reasonable considering a reported 170,000 annual visitors, a special exhibit added at the Old Penitentiary in FY03, and increased adult admission from \$4 to \$5 FY04. The report recommends that the Historical Society erect signs near cash registers requiring patrons to obtain receipts; have a supervisor and cashier complete daily cash register closeouts; require explanations for voided receipts, and monitor and investigate excessive voided transactions; and monitor cash collections compared with checks for unusual trends or spikes.

An audit of the Idaho State Historical Society found noncompliance with travel and purchase card use, inefficient and inaccurate accounting, and inadequate internal controls in handling facility admission receipts.

Staff Contact: Ray Ineck

Interim Committee Activities

Community Colleges

The fourth meeting of the committee was held September 11, 2006, at the College of Southern Idaho in Twin Falls. Dr. Gerald Beck, president of CSI, described the student population served by CSI, the methods used to fulfill the college's mission, how the college adapts to employer needs through its instructional offerings, funding, expenditures, access to programs, partnering with school districts and industry and economic development.

Representatives from the Idaho Association of Counties, the Association of Idaho Cities and a Twin Falls county commissioner discussed the distribution of liquor account revenues to cities and counties. The original purpose of apportioning moneys to cities and counties from this account was to assist local governments in offsetting the costs of dealing with the impacts of liquor consumption. That purpose is still valid even though noncommunity college district counties must use a portion of that money for tuition payments to community colleges.

The topic of the effectiveness of preparation, in kindergarten through twelfth grade, for the transition to postsecondary education without remediation was addressed by school administrators and a representative of the Idaho School Boards Association. Feedback to K-12 schools is an important element if remediation and its associated costs are to be reduced.

In testimony taken from the public, it was reiterated that the committee should consider lowering the two-thirds requirement for formation of a community college district, to a simple majority.

The fifth and possibly final meeting of the committee will be held on October 3, 2006, in JFAC Room 328 of the State Capitol Building in Boise.

Staff Contact: Maureen Ingram

Early Childhood Education

The Early Childhood Education Task Force, co-chaired by Senator Tom Gannon and Representative Jack Barraclough, met in Boise on August 24, 2006. The task force is charged with studying the existing state, federal and private resources devoted to early childhood education and development, identifying the options the state of Idaho could consider to impact early childhood education and development, and making recommendations to advance kindergarten readiness of Idaho children entering the state K-12 education system.

Information was presented to the task force from a wide range of interested parties, including former first lady Patricia Kempthorne, representatives from the Cornerstone Institute, Idaho Coalition of Home Educations, Christian Home Schoolers of Idaho, Idaho Association for the Education of Young Children, University of Idaho's Parents as Teachers demonstration project, Department of Health and Welfare's Infant and Toddler Program, Idaho Education Association, State Board of Education, Idaho Department of Education, Boise State University, and the Governor's Early Care and Learning Initiative.

Membership of all interim committees, meeting minutes and a calendar of scheduled meetings are all available on the Legislature's Web site:

[Interim Committees](#)

[Legislative Calendar](#)

The task force voted to recommend that the Legislative Services Office draft a bill that would allow school districts, permissively and voluntarily, to provide educational services to children four years of age. The task force also voted to form a subcommittee, composed of both task force members and other appropriate stakeholders, to formulate and agree on recommendations for consideration at the next task force meeting, which will be scheduled once the subcommittee has had a chance to meet and advance recommendations.

Staff Contact: Paige Alan Parker

Energy, Environment and Technology

The Energy, Environment and Technology Interim Committee met on August 24, 2006, to hear updates from its various subcommittees as summarized below.

Generation Involving Renewables and Conventional Energy Sources

Representative Anderson stated that the subcommittee had, at this time, eliminated the discussion of coal due to the governor's decision to opt the state out of the Environmental Protection Agency Mercury Cap and Trade Program and what that would mean to various electric generation alternatives. He said the subcommittee consensus was that mercury is produced by other things that do not have the same monitoring requirements coal does.

The subcommittee discussed low-impact hydropower. This is also known as "kinetic portion" and includes underwater windmills and the like. Information was presented indicating this could provide a lot of power.

Representative Anderson said the subcommittee found that wind power is definitely part of the investor-owned utility integrated resource plans and that it will be part of the future energy picture. He noted that generation cannot be looked at without also looking at transmission. Wind farms in areas that do not have transmission do no good. He added that it is very expensive to build transmission.

Conservation and Demand-Side Management

At a September 6 meeting, the subcommittee adopted the following policy statement: In order to protect and enhance Idaho's quality of life, it is incumbent on all citizens to use Idaho's precious natural resources, including energy, in a wise and responsible manner.

Wise use of energy sources means that each unit of energy not used or used more efficiently has a positive effect on current cost and the availability of energy for future generations. Through leadership, education, communication and action the citizenry will leave a legacy of the acceptance of energy responsibility to Idaho, neighboring states and emerging economies.

Siting Generation and Transmission

Senator Fulcher gave the report for this subcommittee, and a presentation was given by the Public Utilities Commission regarding siting transmission lines and how state authority could be usurped by the Federal Energy Regulatory Commission,

The Early Childhood Education Task Force will consider draft legislation at its next meeting that would allow school districts, permissively and voluntarily, to provide educational services to children four years of age.

pursuant to U.S.C. Section 1221, regarding National Interest Corridors. Subsequently, the subcommittee passed a motion placing transmission siting authority with the PUC for National Interest Corridors.

The subcommittee also passed the following motions:

- ▶ That a memorial be drafted supporting an amendment to the Internal Revenue Code regarding the private activity definition, supporting legislation that would provide tax-exempt status for bonds issued by state agencies that expand interstate transmission or pipeline capacity.
- ▶ That legislation be drafted to provide a sales tax exemption for materials used in transmission facilities or distribution lines.
- ▶ That the State Energy Plan should include language for the development of pertinent incentives for long-term investment in transmission facilities.
- ▶ That the subcommittee recommends no change in Idaho's current siting process.

Natural Gas and Transportation Fuels

Recommendations of the **Biofuels Working Group**, discussed earlier and finalized at a September 7 meeting, include:

- ▶ Provide grants to retailers for biofuels infrastructure.
- ▶ Provide investment tax credits for biofuels production, transportation and distribution infrastructure.
- ▶ Promote a culture of conservation.
- ▶ Provide a counter-cyclical biofuel produce incentive that supports the industry when wholesale prices for biofuels decline below certain levels.
- ▶ Support a flexible-fuel vehicle state-fleet pilot project.
- ▶ Provide incentives to livestock feeders to use ethanol plant byproducts for feed.

Petroleum

- ▶ Promote conservation as primary means of improving the reliability and cost of Idaho's transportation fuel supply while also encouraging development of new resources.
- ▶ Support responsible exploration and production of petroleum supply and expansion of transmission, storage and distribution infrastructure benefiting Idaho.
- ▶ Work with other states to promote increase in the federal CAFÉ standards.
- ▶ Encourage use and purchase of hybrid, high mileage, alternative and flex-fuel vehicles.
- ▶ Explore opportunities for adoption by private and state-owned fleets, public transportation and school buses.
- ▶ Promote use and expansion of public transportation where effective in reducing vehicle miles traveled, including intercity transportation where feasible.

To accomplish its goals, the Energy, Environment and Technology Interim Committee has appointed four subcommittees:

Generation Involving Renewables and Conventional Energy Sources;

Conservation and Demand-Side Management;

Siting Generation and Transmission; and

Natural Gas and Transportation Fuels.

- ▶ Promote reduction of truck and tour bus idling.
- ▶ Investigate encouraging use of rail and intermodal freight transportation where feasible.

Incentives for **alternative fuels** include tax deductions, tax exemptions, tax credits, loans, loan guarantees, grants, and parking and high-occupancy vehicle lane privileges. Potential measures include, but are not limited to:

- ▶ Encourage state fleet purchases and use of alternative fuel and fuel efficient vehicles.
- ▶ Incentives for Idaho alternative fuels feedstock providers and producers.
- ▶ Encourage future development of cellulosic ethanol production in Idaho.
- ▶ Incentives for the purchase of flex-fuel and alternative fuel vehicles.
- ▶ Incentives for retail and wholesale alternative fuel supply infrastructure.
- ▶ Incentives for the sale and purchase of alternative fuels.
- ▶ Promote research and development and business-university partnerships to speed the commercialization of alternative fuel technologies.
- ▶ Encourage education and promotion campaigns for alternative fuels.

Measures for **conservation and efficiency in transportation fuel usage** include:

- ▶ Work with other states to promote an increase in federal CAFÉ standards.
- ▶ Incentives for the purchase of high mileage, flex-fuel and alternative fuel vehicles.
- ▶ Promote the use and expansion of public transportation where feasible.
- ▶ Promote the reduction of truck and tour bus idling.
- ▶ Encourage the use of rail and intermodal freight transportation where feasible.
- ▶ Encourage regional land use planning/policies minimizing vehicle miles traveled.

Natural gas measures include:

- ▶ Encourage the highest and best use of natural gas.
- ▶ Encourage direct end use in applications for which natural gas is the most efficient energy source.
- ▶ Encourage use of natural gas vehicles for company and/or state-owned fleets.
- ▶ Promote nontraditional natural gas supply resources, including landfill methane, anaerobic digesters and biomass methane.
- ▶ Support responsible exploration and production of natural gas supplies and the expansion of the transmission, storage and distribution infrastructure.
- ▶ Support the siting of liquid natural gas terminals and other infrastructure in the United States to provide delivery capability to Idaho.

Incentives to encourage development of alternative fuels include tax deductions, tax exemptions, tax credits, loans, loan guarantees, grants, and parking and high-occupancy vehicle lane privileges.

OPE's Report on ISIMS Includes Best Practices Checklist for IT Projects

The Office of Performance Evaluations released its report on the lessons learned from the failed Idaho Student Information Management System (ISIMS). ISIMS, a partnership between the state and the JA and Kathryn Albertson Foundation, failed because of poor planning and a lack of end-user involvement.

Idaho Code defined ISIMS as “a secure, centralized data system where public school information [would be] stored, accessed and analyzed.” While the vision was grand, evaluators found that the State Board of Education did not monitor the project's progress nor establish rules to guide it; the Albertson Foundation retained “absolute and sole” control of the project. The Department of Education's representative on the ISIMS management team lacked authority, limiting the department's ability to advocate for the state and resulting in poor contract oversight and poorly invested public resources.

Evaluators found that the ISIMS project impacted the state in a number of ways. The project's positive impacts included recognition of the need for standardized data collection and an increased understanding of technology issues, capabilities and limitations. Both the ISIMS project itself and its eventual termination had a negative impact on morale and credibility at the school, district and state levels.

As the state moves forward with improvements to its system of collecting and reporting student information, the State Board and the Department of Education should learn from the lessons of the ISIMS project. Technology projects should clearly define the roles and responsibilities of all stakeholders and consider views, needs and resources of end-users at each stage. In addition, technology projects should maintain a realistic scope, supported by realistic expectations of technology and an updated project plan. The ISIMS project did not adequately address these key issues.

The OPE report strongly recommends the use of its best practices checklist for not only education, but for all future state technology projects. Rachel Johnstone (team lead), Amy Lorenzo, and T.J. Thomson conducted the study.

Staff Contact: Rakesh Mohan

New OPE Staff

Sean Borzea earned a master's of public administration from Arizona State University and is now working toward his Ph.D. in public administration from ASU. His studies focus on the role of experts and the public in transportation decision making. His previous experience includes a position as a research assistant with the Morrison Institute for Public Policy in Tempe, Arizona, and as a performance auditor with the Arizona Auditor General's Office.

Brekke Wilkinson came to the office from the Idaho Transportation Department. The technology resource for OPE, she supports staff with their research efforts. She has worked as a software trainer, instructor and as a technology program coordinator in Idaho and in Seattle, Washington. A graduate of the University of Idaho, Brekke is currently pursuing a master's degree in information systems at Boise State University.

The OPE report on the Idaho Student Information Management System recommends the use of its best practices checklist for all future state technology projects. OPE reports are available on OPE's [Web site](#) or upon request by calling 208/334-3880.

LSO Staff Update

Robyn Davis joined the Legislative Services Office in September 2006 as the legislative relocation project specialist. She will facilitate the Legislature's planned relocation to the Capitol Annex following the 2006 legislative session and the move back to the Capitol upon completion of the renovation. Robyn has an event planning and fundraising background and has previously worked for Boise's Ronald McDonald House and for Habitat for Humanity International. She graduated from Gonzaga University with a degree in journalism and spent a year abroad in Florence, Italy.

Legislative Audit Division Manager **Ray Ineck** recently announced that he will retire at the end of December. An auditor since 1971, Ray was appointed manager of the Audit Division in 2002.

Aimee Hayes joined the staff of the Legislative Audits Division in August. She recently moved to Idaho from San Jose, Calif., where she was employed as a senior auditor for the international accounting and tax firm Grant Thornton, LLP. Aimee has also worked for private firms in Utah and Nevada. She obtained her B.A. in accounting from the University of Nevada and is working toward obtaining a CPA.

The Legislative Reference Library welcomes **Mark Robertson** as the new library assistant. Mark's anthropology degree from the University of Montana included coursework in library science. He is filling the position vacated by **Marsha Jorgenson**. Marsha, who provided library assistance for three years, has moved to Lewiston.

Librarian Kristin Ford was appointed chair of the Legislative Research Librarians' staff section of the National Conference of State Legislatures at NCSL's annual meeting in August. One of Kristin's first duties as chair was to present a Notable Document Award to Office of Performance Evaluations Director **Rakesh Mohan** for the 2005 OPE report *Use of Social Security Numbers, for Drivers' Licenses, Permits, and Identification Cards*. Ten research reports from seven states were honored with the award this year.
